

Week 1 - Personal Portfolio Website

Introduction

For Week 1 of the Web Development Internship, I created a simple Personal Portfolio Website using HTML5. The main objective of this task was to understand the basic structure of a webpage and learn how different HTML elements work together.

The website contains information about me, my technical skills, and a contact form through which visitors can send a message.

What I Learned

While working on this project, I learned:

- Basic HTML5 structure
 - Semantic HTML tags
 - Creating sections in a webpage
 - Using images in HTML
 - Creating forms
 - Internal navigation using links
-

Website Sections

About Me

In this section, I introduced myself as a B.Tech student at IIT Jodhpur and mentioned my interests in Artificial Intelligence, IoT, Embedded Systems, and Web Development.

Skills

This section contains a list of my technical skills such as HTML, C Programming, C++, Python, Git, GitHub, IoT, and Embedded Systems.

Contact

In this section, I created a contact form with Name, Email, and Message fields.

Tools Used

- HTML5
 - VS Code
 - Google Chrome
-

Project Folder Structure

PortfolioWebsite/

|— index.html

|— README.md

|— images/

 |— profile.jpg

How to Run the Project

1. Download the project files.
 2. Open the project folder in VS Code.
 3. Open the index.html file.
 4. Run it using Live Server or open it directly in a browser.
-

Requirements Completed

- ✓ Created index.html
- ✓ Added About section
- ✓ Added Skills section
- ✓ Added Contact section

- ✓ Used semantic HTML tags
- ✓ Added internal navigation links
- ✓ Added profile image
- ✓ Created contact form

About Me

Hello! I am Nitish Kumar Das, a B.Tech student at IIT Jodhpur.

I have a keen interest in Artificial Intelligence, Internet of Things (IoT), Embedded Systems, and Web Development. I am passionate about technology and software development, always eager to learn and build innovative solutions.

Skills

Technical Skills

- HTML
- C Programming
- C++
- Python
- Git
- GitHub

Conclusion

This project helped me understand the fundamentals of HTML and webpage structure. Through this assignment, I gained practical experience in creating a basic website and organizing content using semantic HTML elements.
